About Swanz

Aware of healthy lifestyle demand in this modern era, Swanz initiate the idea of producing a healthy drinking ware that is ideal for daily use. The idea of healthy is to minimize chemical intake to the body by using the right material which does not produce any additional chemical reaction.

Interior Porcelain that is carefully fabricated to our product made Swanz brand tumbler not just healthy but also to be unique and special compared to others.

Using the highest grade fine porcelain, we ensure every piece of our product to be durable, chemical free and suitable for all kinds of beverages and food.

"SWANZ," like migratory birds - elegant and resilient as swans.

Founded in 2009 in Singapore, SWANZ recognized the demands of modern healthy living. Starting with the concept "Health can be simple and stylish," the brand strives to use materials that minimize the intake of chemicals into the body. Overcoming manufacturing challenges, SWANZ has dedicated itself to researching and designing innovative and health-conscious ceramic household products.

With over a decade of experience in the thermal cup market, SWANZ is meticulous in material selection. The products are crafted from high-temperature firing at 1200°C-1400°C, resulting in premium ceramics. The use of food-grade 304 stainless steel and the latest developed clean porcelain coating ensures your safety. SWANZ also ensures that most of its products are sustainable, providing you with cups, bottles, or tableware that you can cherish and use for a longer time.

Having its own design team, SWANZ offers unique and health-conscious products. The designs are registered in Singapore, and the brand introduces new products every year, always seeking innovation and change.

Swanz Technology

Porcelain has been used for cooking, storing and drinking beverages for centuries. Traditionally, there are many health benefits associated with porcelain. Our fine porcelain specifically is known to be able to enhance the aroma and flavor of the food and beverage.

Using this special porcelain that contained calcium, Swanz is whiter, lighter and also stain and corrosion free.

All of our products are made of high quality materials. The grade of the stainless steel vessel we used are 304 stainless steel grade which are sturdy and corrosion free.

To make Swanz even more special, Swanz products are also vacuum insulated. They keep your food and beverages to be hot or cold for at least 5 to 8 hours.

Patented in Japan

SWANZ's premium ceramic inner core is crafted through a secondary high-temperature firing process, paired with a newly developed clean porcelain coating, ensuring natural safety and non-toxicity. It eliminates the risk of metal leaching and avoids chemical reactions with food, faithfully preserving the original taste of the food.

The lightweight ceramic processing breaks away from the traditional perception of heaviness, significantly reducing the weight of the ceramic and making it more convenient to use.

By incorporating the innovative material graphene, SWANZ introduces a variety of design possibilities. The tableware not only serves for storage but also facilitates direct cooking, adding versatility to its functionality.

With a 3-layer vacuum insulation and an additional copper-reinforced thermal function, SWANZ products extend the retention time of food temperatures in thermal products.

These features are the unique secrets behind SWANZ products, and the brand has applied for patents in Japan and Taiwan, achieving milestones that other brands cannot imitate.

*Thermal Flask

Unique Selling Point

Free from Any Chemical

Rest assured, all of Swanz products are 100% BPA, metal leaching and chemical free.

No Leftover Stain and Smell

We understand that leftover stains and smell from coffee or tea could be very irritating sometimes. That is why our porcelain Swanz tumbler is free from stain and smell.

Suitable for Any Food and Beverages

With Swanz tumbler you can put anything you like. You can keep changing your beverages as you like without worrying about stain, smell and chemical reaction.

Enhances Your Drinking Experience

Its porcelain interior allows you to sip it directly without scalding your mouth. Its white interior also scientifically proven to enhance your drinking experience.

2in1 Kokoro Collection

The Kokoro Collection perfectly defines the concept of turning one cup into two, utilizing a design philosophy of pairing cups for both versatile use and sustainable practices. By combining the inner and outer cups or using them separately, it adds a more diverse range of applications, transforming into a multifunctional and high-value product.

Kokoro

Kokoro Flask

SY-088+

Revolutionary: Swapable ceramic core in a thermal cup. Choose warm ceramic or use the lightweight outer cup alone, tailored to your preferences.
